PARTICIPATIONS AND CERTIFICATIONS

- [Harvard University\(CS50x_PuzzleDay\)](#): Received [Participation Certificate](#) for CS50x Puzzle Day 2026 by successfully participating in the international problem-solving event.
- [Gemini 3 Hackathon](#): Participated in the [Gemini 3 Hackathon](#) and developed an AI-based project.
- [WebMind Innovation Hackathon](#): Participated in the [WebMind Innovation Hackathon](#), working on innovative software and AI solutions.
- [Reddit Mod Tools and Migrated Apps Hackathon](#): Currently working on a submission for the Reddit Mod Tools and Migrated Apps Hackathon, focused on moderation tools and migrated application solutions.
- [Kaggle](#): Successfully completed the *Python* course and earned a [certification](#) in Python programming fundamentals.
- [Analytics Vidhya](#): Earned [certification](#) in n8n workflow automation and AI-powered task orchestration through practical automation projects.

EDUCATION

COMSATS UNIVERSITY ISLAMABAD, SAHIWAL

Sep 2023 - Present

Current CGPA: 3.40 / 4.00

- Bachelor of Science in Computer Science.
- Relevant Coursework: Data Structures and Algorithms, OOP, DBMS, Web Development, Operating Systems, Computer Networks, AI, Mobile App Development.

ACADEMICS PROJECTS

CyberGuard Pro | *Python, Streamlit, Cryptography, SQLite* | [\[Github link\]](#)

- Developed a modern information security suite featuring secure user authentication, AES-128 (Fernet) encryption/decryption, and secure file handling.
- Implemented password hashing using PBKDF2-HMAC-SHA256 with salted credentials and integrated Base64 encoding/decoding tools.
- Designed a responsive cyberpunk-themed UI with password generation, session management, and interactive security features using Streamlit.

Spotify Clone | *HTML, CSS, JavaScript, Web APIs* | [\[Github link\]](#)

- Developed a modern Spotify-inspired multi-page music streaming web application with responsive UI/UX and interactive frontend architecture.
- Implemented authentication system, playlist management, music playback controls, live search, liked songs, saved albums, and personal library features.
- Integrated LocalStorage and Audio API for persistent user sessions, dynamic music playback, and real-time application state management.

SHOPPINGO | *PHP, MySQL, HTML, CSS, JavaScript, XAMPP* | [\[Github link\]](#)

- Built a database-driven e-commerce web application featuring user authentication, product browsing, shopping cart management, and real-time order tracking.
- Developed a fully functional admin panel for managing products, users, inventory, and customer orders using MySQL relational database operations.
- Implemented secure login functionality, CRUD operations, and optimized database schema design to simulate a real-world online shopping platform.

HACKATHONS

Nova AI Voice Control Assistant | *Python, Streamlit, Groq API, SpeechRecognition* | [\[Submission link\]](#)

- Developed an AI-powered voice-controlled assistant with a modern Streamlit interface for real-time interaction and desktop automation.
- Implemented continuous speech recognition, text-to-speech functionality, and natural language command processing using Groq API integration.
- Built features for application control, Google/YouTube search, conversational AI responses, and real-time status monitoring with robust error handling.

Reimagine – Website Transformation System | *HTML, CSS, JavaScript, Firebase, Figma* | [\[Submission link\]](#)

- Developed a web transformation platform focused on improving website design, responsiveness, accessibility, and SEO performance.
- Integrated visual analysis and SEO optimization concepts to provide smart recommendations for layout, readability, keyword usage, and user experience improvements.
- Utilized the Reimagine Web AI Tool to analyze websites and gain insights into design quality, responsiveness, and search engine visibility enhancements.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, JavaScript
- **Web Dev:** HTML5, CSS3, Bootstrap 5, React.js, REST APIs
- **Backend:** Python, FastAPI, Streamlit, Flask
- **AI:** Generative AI, LLMs, Agentic AI Development, AI Automation
- **ML/DL:** Tensorflow, Keras, OpenCV, scikit-learn, Numpy, Pandas
- **Tools and Platforms:** Git, Github, Docker, VS Code, Jupyter Notebook, Postman, Canva
- **Databases:** MySQL, MongoDB, SQLite
- **Mobile App Development:** Android Studio, Flutter
- **Soft Skills:** Problem Solving, Team Collaboration, Project Management
